

## 6 Using the Parking Area

Many apartment buildings in Saitama Prefecture have parking spaces that you can rent. You **cannot** use the parking area if you have not rented a space.

You **cannot** park on the road in front of the building and many other areas. If you do, emergency vehicles like ambulances (cars that drive people to a hospital) and firetrucks (cars that bring water during a fire) cannot get to the building. Many accidents happen when people park cars in the wrong places, so please follow the parking rules.

Only people who are visiting your apartment building can use the guest parking area. (This area may have a sign that looks like this: 外来用 *gairaiyō*.) You must ask a neighborhood association member if you can use the guest parking area for a visitor. If you do not, you will make problems for visitors and other people living in the apartment building.
