

Be Alert For **Fires** In Storage Areas!

Saitamatch

Fires have been occurring frequently in the plastic and metal scrap storage areas! Keep your work areas tidy and regularly check the fire-extinguishing equipment is in proper working order.

Basic rules for managing outdoor storage facilities

- Keep your work areas tidy at all times and ensure evacuation routes remain clear.
- Follow proper storage limits and keep space between materials
(per Saitama Prefecture Regulation on the Control of Outdoor Storage Businesses for Specified Recyclable Resources)

Procedures for flammable work (welding, cutting, etc)

- Check the surroundings first and do not work near any flammable materials
- Prepare fire extinguishing equipment in advance

Do not do open waste burning

- All waste from your facility must be handled by a licensed waste management services
※Open waste burning is prohibited under the Waste Management and Public Cleaning Act and carries severe penalties.

Management of electronic devices containing lithium-ion batteries

- Sort devices by type, and insulate the terminals (e.g. with tape)
- Store them away from flammable materials, and do not leave them exposed to rain or high temperatures
- Avoid strong impacts
- If an appropriate disposal procedure cannot be secured, do not accept disposal

Lithium-ion batteries
