# Air Quality in Japan

— Overview of Air Quality Measurement Methods —

Atmospheric Environment Group  
Center for Environmental Science  
in Saitama (CESS)

### Air Quality Chronology

Fiscal Year	Saitama Prefecture		National
	Department Responsible for Analytical Survey	Prefectural Ordinances	Laws
1962		Prefectural Pollution Control Ordinance	★ Smoke and Soot Regulation Law
1964	Environmental Pollution Section of Environmental Health Division, Hygiene Department		
1967			∴ Basic Law for Environmental Pollution Control
1968	→ Pollution Control Office, Hygiene Department → Environmental Pollution Division, Department of Public Services		★ Air Pollution Control Law
1969		Prefectural Pollution Control Ordinance was fully revised	
1970	Saitama Institute of Environmental Pollution		
1971			Offensive Odor Control Law Law Concerning the Improvement of Pollution Prevention Systems in Specific Factories
1978		Prefectural Pollution Control Ordinance was fully revised	
1992			● Automobile NOx Law
1993			∴ Establishment of the Basic Environment Law
1994		Prefectural Basic Environment Ordinance	
1999			Law Concerning Special Measures against Dioxins
2000	Center for Environmental Science in Saitama (CESS)		
2001			● Automobile NOx/PM Law
2002		Prefectural Ordinance on the Conservation of the Living Environment	

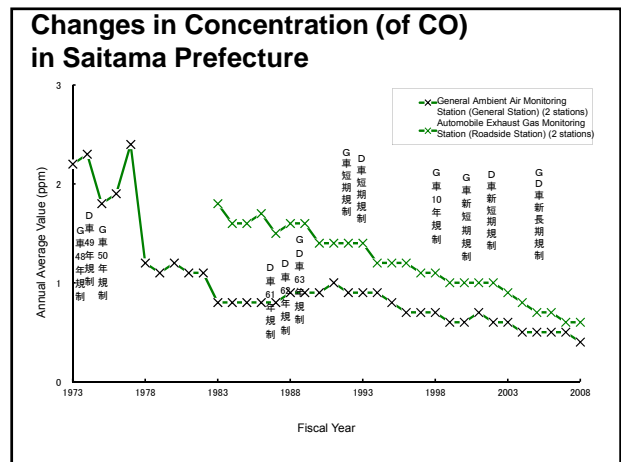

### Environmental Quality Standards for Air Pollution

The Environmental Quality Standards shall be as follows: From the view of the environmental conditions related to air pollution, not only the items whose maintenance is considered preferable for the protection of human health and the conservation of the living environment, but also the standards for such items.

object substance

sulfur dioxide	SO <sub>2</sub>
carbon monoxide	CO
suspended particulate matter	SPM
photochemical oxidants	Ox
nitrogen dioxide	NO <sub>2</sub>
benzene	C <sub>6</sub> H <sub>6</sub>
trichloroethylene	C <sub>2</sub> HCl <sub>3</sub>
tetrachloroethylene	C <sub>2</sub> Cl <sub>4</sub>
methylene chloride	CH <sub>2</sub> Cl <sub>2</sub>
dioxin	PCDD, PCDF, DL-PCB
minute particulate matter	PM <sub>2.5</sub>

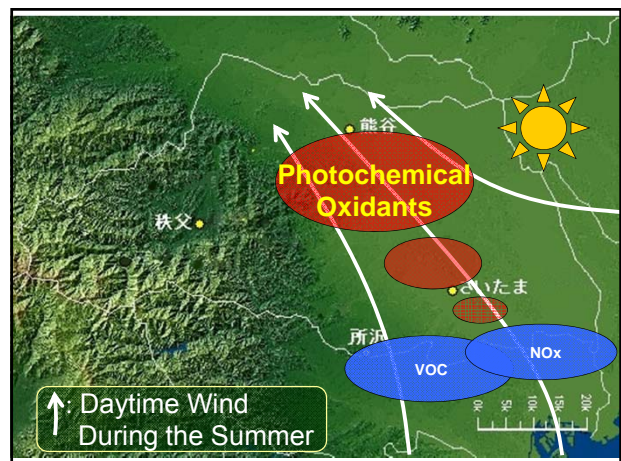

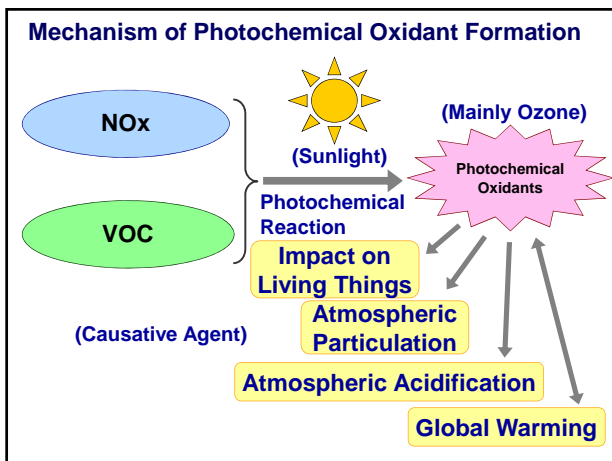

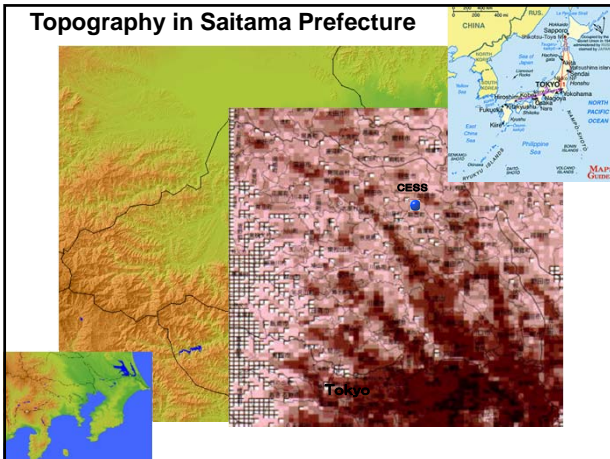

## Photochemical Oxidants (Ox) (Photochemical Smog)

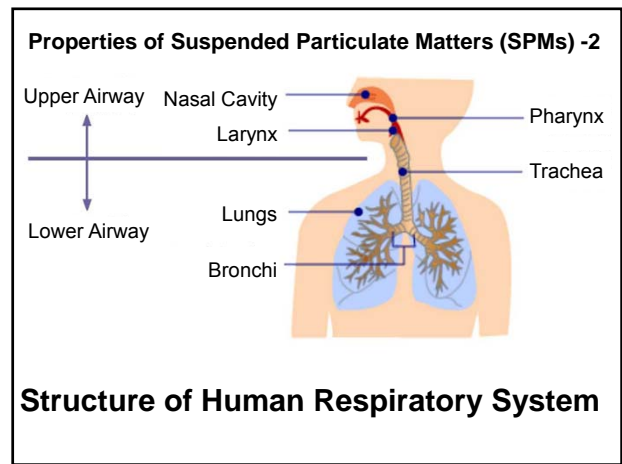

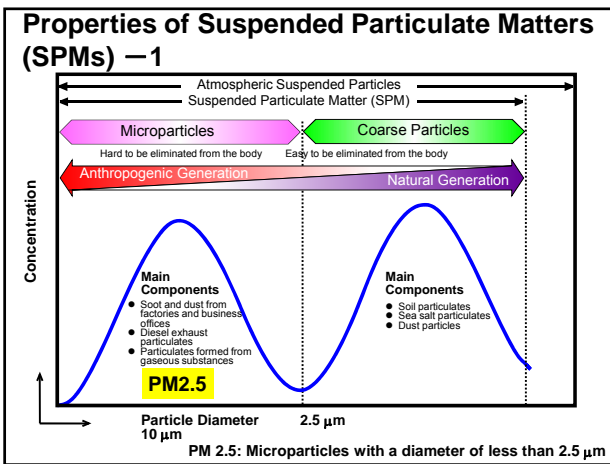

### Ranking for the Total Number of Days When A Smog Alert was Issued

	2000	2001	2002	2003	2004	2005	2006	2007	2008	2009
1st Place	Saitama	Saitama	Saitama	Saitama	Chiba	Chiba	Tokyo	Saitama	Tokyo	Saitama
2nd Place	Ibaraki	Chiba	Chiba	Ibaraki	Saitama	Saitama	Osaka	Kanagawa	Saitama	Osaka
3rd Place	Tokyo	Tokyo	Tokyo	Osaka	Tokyo	Tokyo	Saitama	Chiba	Chiba	Aichi
4th Place	Osaka	Osaka	Gunma	Chiba	Ibaraki	Tochigi	Kanagawa	Tokyo	Gunma	Tochigi Tokyo
5th Place	Tochigi	Tochigi	Ibaraki	Tochigi	Kanagawa	Ibaraki	Yamanashi	Tochigi	Kanagawa	

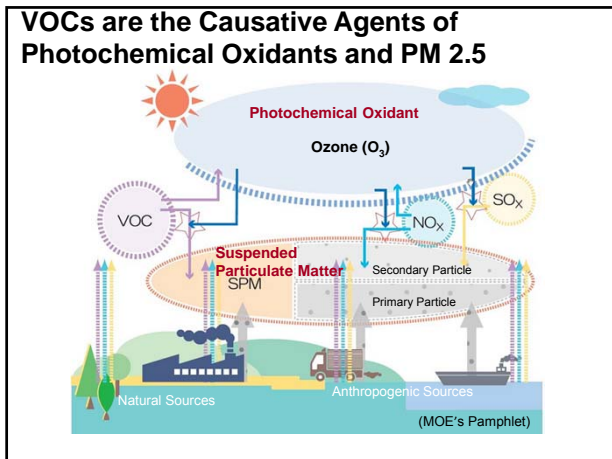

**PM 2.5**

**Structure of Human Respiratory System**

**VOC**

### VOC Emission Control

VOC Emission Control (Air Pollution Control Law)

Voluntary Efforts to Control VOC Emissions (Air Pollution Control Law)

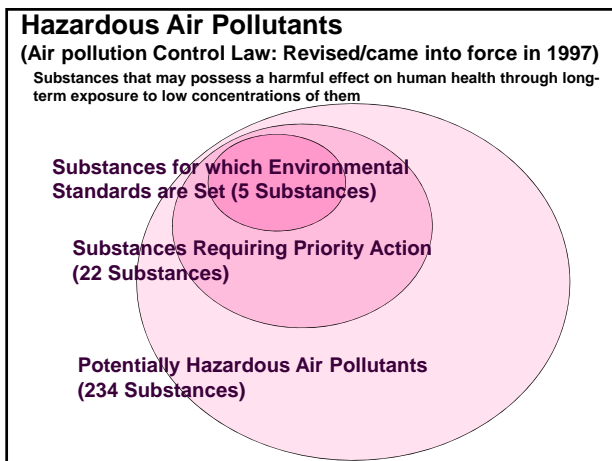

- ➔ Exhaust Emissions Survey of the Facilities Covered by Relevant Regulations

Regulations on Facilities Emitting VOCs (Prefectural Ordinance on the Conservation of the Living Environment)

VOC Measurement and Technical Advice for VOC Emission Control

- ➔ VOC Survey to Support VOC Emission Reduction

## Hazardous Air Pollutants

## Asbestos

### What is Asbestos?

- A General Term for Natural Fibrous Minerals
- Definition by ILO (International Labor Organization)  
Fibrous inorganic silicates belonging to the serpentine group or amphibole group, both of which are minerals derived from rock

- The following three types of asbestos were practically used:
- **Chrisotile (White Asbestos)** Chrisotile 1
- **Amosite (Brown Asbestos)** Amosite 100
- **Crocidolite (Blue Asbestos)** Crocidolite 500

#### Toxicity

### Asbestos Import and Trends in the Incidence of Mesothelioma

### Changes in Asbestos Consumption in Different Countries

Changes in Asbestos Consumption in the U.S., Japan, and China (U.S. Geol. Serv Minerals Yearbook, and Japanese Custom Statistics)

### Offensive Odor

### Odor Nuisance

#### Regulations Concerning the Concentration of Specified Offensive Odor Components (22 Substances)

Ammonia, methyl mercaptan, hydrogen sulphide, methyl sulphide, methyl disulphide, trimethylamine, acetaldehyde, propionaldehyde, n-butylaldehyde, isobutylaldehyde, n-valeraldehyde, isovaleraldehyde, isobutanol, ethyl acetate, methyl isobutyl ketone, toluene, xylene, propionic acid, n-butyric acid, n-valeric acid, and isovaleric acid

#### Odor Index Regulation — Triangular Odor Bag Method

### Triangular Odor Bag Method — 1

Triangular Odor Bag Method — 2

Triangular Odor Bag Method — 3

System for Offensive Odor Control
